SouthCoast Medical Group's Imaging Center awarded accreditation in Computed Tomography

SouthCoast Medical Group's Imaging Center has been awarded a three-year term of accreditation in Computed Tomography as the result of a recent survey by the American College of Radiology.

The ACR, headquartered in Reston, Va., awards accreditation to facilities for the achievement of high practice standards after a peer-review evaluation of the practice. Evaluations are conducted by board-certified physicians and medical physicists who are experts in the field. They assess the qualifications of the personnel and the adequacy of facility equipment. The surveyors report their findings to the ACR's Committee on Accreditation, which subsequently provides the practice with a comprehensive report.

The ACR is a national organization serving more than 32,000 diagnostic-interventional radiologists, radiation oncologists, and nuclear medicine and medical physicists with programs focusing on the practice of medical imaging and radiation oncology and the delivery of comprehensive health care services.

SouthCoast Medical Group's Imaging Center is the first independent multimodality outpatient imaging center in coastal Georgia to have accreditation of all major modalities to include: MRI, CT, Digital Mammography, Ultrasound, and Nuclear Medicine.
